

# WASHINGTON STATE DEPARTMENT OF HEALTH OFFICE OF FOOD SAFETY AND SHELLFISH PROGRAMS

## ANNUAL GROWING AREA REVIEW

**PREPARED BY:** Donald Melvin, Environmental Specialist

**AREA:** Saratoga Passage

**YEAR ENDING:** December 31, 2005

**CLASSIFICATION:** Approved, Prohibited, Unclassified

### ACTIVITIES IN THE GROWING AREA IN 2005:

Samples were collected from each station in the growing area 6 times during the year using the systematic random sampling method. DOH conducted a shoreline survey of approximately 29 miles of marine shoreline in response to a request for commercial harvest. The Department evaluated 51 drainages or discharge points, 281 developed parcels, and 9 agricultural activities along the shoreline and upland areas. The survey report has not been finalized and the survey area is still unclassified. Beaches near Forbes Point and Oak Harbor were closed for 15 day due to a wastewater treatment plant malfunction. Portions of the area were closed for 18 days due to high levels of biotoxin in Penn Cove.

### ANALYTICAL RESULTS OF WATER SAMPLES:

Table #1 summarizes the results of all samples collected from the area. This summary shows that all stations in the approved portion of the growing area pass the NSSP water quality standard.

### CHANGE IN ACTUAL POLLUTION SOURCES THAT IMPACT THE GROWING AREA:

We currently have no information indicating that the area has new sources of pollution.

### CLASSIFICATION STATUS:

- ☒ Well within the classification standards
- ☐ Meets standards but some concerns
- ☐ Meets standards but threatened with a downgrade in classification
- ☐ Fails to meet classification standards

### REMARKS AND RECOMMENDATIONS:

Table #1 shows that all stations meet the NSSP water quality standards for approved classification and the area is correctly classified.

All tides information is presented

The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms/100 ml and an estimate of the 90th percentile not greater than 43 organisms/100 ml. The above table shows bacteriological results in relation to program standards.

\* N/A - SRS criteria require a minimum of 30 samples from each station. \*
